• Rinoloji - Dairesel Kesme Pançı
• Rhinology - Circular Cutting Punch

Multipurpose use

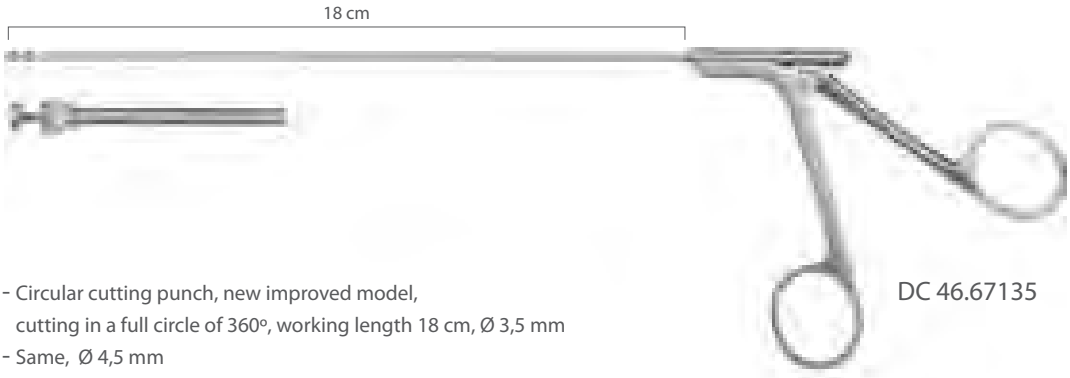

- Useful to enlarge openings in the sphenoid frontal wall
- Pieces of the nasal concha, thin bone segments and bony ethmoid septa can be cut
- Useful for treatment of choanal atresia

Advantages

- Circular cutting punch mechanism allows cutting in a full circle of 360° without rotating the instrument
- By punching exclusively in the sagittal axis, traumata of cranium, carotis and optic nerve osseous canal are virtually impossible

Circular Cutting Punch, New Improved Model Advantages

- The rigid inside cutting distal jaw prevents the removal of tissue or mucosa while cutting

DC 46.67135

DC 46.67135 - Circular cutting punch, new improved model, cutting in a full circle of 360°, working length 18 cm, Ø 3,5 mm
